Green-e® Energy Certified New ² Renewables in Green Power <u>2023</u>		Generation Location
-Biomass	%	
-Geothermal	%	
-Low impact hydroelectric ³	%	
-Solar	100 %	Colorado
-Wind	%	
Total Green-e® Energy Certified New Renewables	100 %	Colorado

1. These figures reflect the renewables that we have contracted to provide. Actual figures may vary according to resource availability. We will annually report to you before August 1 of next year in the form of a Historical Product Content Label the actual resource mix of the electricity you purchased.

2. New Renewables come from generation facilities that first began commercial operation within the past 15 years.

For comparison, the current average mix of resources supplying Colorado Springs Utilities includes: Coal (22.45%), Nuclear (0%), Oil (0%), Natural Gas (45.93%), Hydroelectric (8.14%), Solar (5.51%) and Other (13.28%). This resource mix was prepared in accordance with Colorado Springs Utilities data.

The average home in Colorado Springs utilities electric service territory uses 625 kWh per month. Source: Colorado Springs Utilities data.
