

# OLYMPIC TRAINING CENTER SWAMP COOLER REPLACEMENT

Water Conservation

The Olympic Training Center is a world-class facility designed to support elite athletes in their pursuit of excellence. The center operates year-round and provides athletes with cutting-edge technology and support services to help them reach their full potential.

The facilities management team recognized that the current Building 7 HVAC system, which used evaporative coolers and gas fueled heaters, presented an opportunity for water and energy savings.

In November of 2022, the Olympic Training Center replaced 18 evaporative coolers and ten gas-fueled heaters with three packaged rooftop units (RTUs) and six destratification fans.

## Water Savings Highlights

**\$10,620**  
qualified rebate

**460,356**  
gallons saved annually

**\$4,246**  
annual bill savings

The results yielded 460,356 gallons of water saved annually, which translates to \$4,246 dollars of water savings each year! With this water savings, the Olympic Training Center was awarded a \$10,620 rebate from our custom water rebate program.
